

eazyMini

10 years of experience in LAMP diagnostics combined in one device.

The latest generation of eazyplex[®] devices, with modern design.

- 2 independent blocks
- intuitive software
- Real-Time-detection
- Barcode scanner integrated
- Label printer connection
- Made in Germany

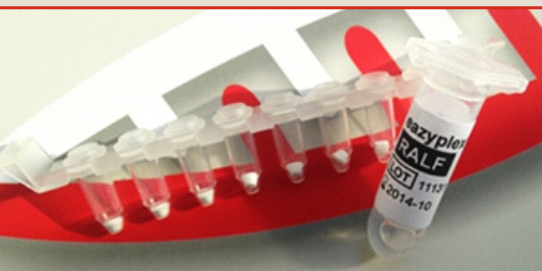

For all those who rely on the latest appliance technology and value quality and design.

The eazyMini is the latest product in the device range, with a modern design and sophisticated details, a light and robust diagnostic unit for rapid single tests 24/7. The eazyMini has two independent heating blocks for maximum flexibility, intuitive software, an integrated barcode scanner and can be connected to the HIS/LIS system via an HL7 interface. The device with the best price-performance ratio meets all the requirements of a modern molecular diagnostic laboratory in a contemporary design.

If you would like to read more details, technical data or comparisons with other options, please scan the QR code and learn more about the eazyplex system.
