

Allplex™ SARS-CoV-2 Master Assay

Screening for SARS-CoV-2 and Variants

Keeping up with SARS-CoV-2 Variants

Allplex™ SARS-CoV-2 Master Assay screens for SARS-CoV-2 and the most reported variants in S gene, which may be associated with increased infectivity and/or change in vaccine effectiveness.

Screening for COVID-19 variants

Detection of COVID-19 and screening for its variant

Automated solution

Short turnaround time (TAT), high-throughput testing on automated platform

Reliable result

With endogenous internal control, minimize false-negative results to ensure the entire process and enable the application of self-collected samples

Multiplex real-time PCR testing in one tube

Accurate multiplex test for five notable S gene mutations in addition to four target genes of SARS-CoV-2 in one tube

Reporting Ct values

Providing individual cycle threshold (Ct) value of multiple targets

Automated solution for efficient workflow
